

MINUTES N° 025

Governance Committee ZERO Energy

Date: August 12, 2026 **Time:** 9:00 AM **Duration:** 0:36 **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its weekly session with partial attendance from its members. The meeting is called to order without waiting for those members yet to join, with the aim of reviewing the status of active workstreams and reaching agreements on the project's next steps.

2. External relations report and status of strategic alliances

The committee receives a report on the actions taken in the context of recent external meetings, which have covered several parallel workstreams.

Information

- New payment integration avenues are being explored. Negotiations remain ongoing.
- Conversations are being held with potential external collaborators across various areas of the project. Details are managed internally.
- The tokenomics work, developed in conjunction with a specialised technical team, is at an advanced stage. Its completion is expected the following week, after which the execution phase will commence.

Conclusion

All three external workstreams remain active. The committee takes note of the anticipated changes to the project onboarding system, the transition of which is scheduled for the beginning of September. The planned informational emails cover this transition for the community.

3. Training course: change of format

The committee is informed of the change of format for the training course planned for late August.

Agreement

- The live session initially scheduled for August 25 and 26 is hereby cancelled.
- The course will adopt a recorded, module-based format with progressive access: each module will be unlocked once completion of the previous one has been validated.
- During the week of August 18 to 20, work will be carried out on the configuration and structuring of the content.

- Once the content has been defined, the corresponding visual support materials (slides) will be produced with the assistance of artificial intelligence tools.
-

4. Team landing page: collection of materials

The committee revisits the progress of the team presentation page and the partners section, which had been partially stalled pending the receipt of external materials.

Agreement

- It is agreed to unblock the process by initiating the collection of available materials immediately, independently of those still pending from external parties.
 - Team members featured on the page will provide the necessary materials for their presentation. Based on these, the presentation texts will be drafted with the support of artificial intelligence.
 - Photographs will be centralised in a shared repository. Should discrepancies in tone or style arise, images will be standardised in black and white.
 - A section featuring project representatives with photographs will be included, in accordance with the team structure.
 - A section featuring the logos of project partners and collaborators will be included. The possibility of establishing visibility agreements with project collaborators who provide direct value to the community will be assessed.
-

5. Scheduled emails through September 1

The committee reviews the status of the ongoing email communication campaign.

Information

- The scheduled email sequence is operational and will be sent progressively through September 1.
 - The emails inform the community of the closure of the current participation format and the launch of the new system on September 1.
 - It is agreed to share the file containing the scheduled emails with all team members for their awareness and review.
-

6. Mass communication tool via WhatsApp

The committee analyses the need to have a direct WhatsApp communication tool available for urgent notifications and campaigns, as a complement to email.

Information

- The committee analyses the advisability of expanding direct communication channels with the community, considering WhatsApp as a channel with greater immediate reach.
- The available technical options for implementing a direct communication channel via WhatsApp are analysed, taking into account the requirements of the platforms involved.
- It is agreed to explore an alternative approach based on the most suitable configuration within the options offered by the platform for projects in the sector, with the aim of enabling the use of the WhatsApp Business API.

Agreement

- It is agreed to move forward with the implementation of this approach. The specific steps will be coordinated internally.
-

7. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned. The next ordinary meeting will take place on Wednesday, August 19, 2026, at 9:00 AM.
