

MINUTES N° 014

Governance Committee ZERO Energy

Date: 20 May 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its fourteenth ordinary session. The meeting addresses the agenda items organically, focusing on platform operations, acquisition strategy, and the internal organisation of the committee.

2. Social media accounts — Current situation and resolution pathways

The committee analyses the current status of ZERO Energy's official accounts on Meta (Instagram and Facebook), which present management restrictions preventing their full use for communication and advertising purposes.

Agreement

- Available pathways to restore full operational access to the existing accounts will be explored, including direct contact with Meta support.
 - Depending on the outcome of such proceedings, a decision will be made as to whether the current accounts are recovered or new accounts are created.
 - It is agreed to resolve this situation on an urgent basis prior to activating any advertising or automation actions linked to social media.
-

3. Payment validation system on the platform

The committee is informed of the implementation of a new payment validation workflow on the platform. The system incorporates a proof-of-payment submission step by the user, enabling the team to cross-reference transactions and prevent validation requests without effective payment.

Information

- The system enters into operation on the same day as the meeting (20/05/2026).
 - A comprehensive tutorial covering the full payment validation process will be produced for internal and support use.
 - Validation criteria for proof-of-payment documents are established for internal use by the support team.
-

4. Frequency of Governance Committee meetings

The periodicity of committee meetings is put to a vote, with deliberation between the current weekly format and a monthly format.

Agreement

- Governance Committee meetings will henceforth be held on a **monthly** basis, scheduled during the **first week of each month**, on Wednesdays at 09:00 AM (Madrid).
 - The calendar will be updated immediately.
 - It is agreed to optimise the internal voting system for greater accuracy in future processes.
-

5. Participation in the leadership group

The committee discusses the level of participation of community leaders in communications and surveys within the leadership group.

Agreement

- The committee reinforces the criteria for active participation in leadership channels, underscoring their importance for the proper functioning of the community.
 - Pending surveys will be resent accompanied by a message reiterating this requirement.
-

6. In-person event on 31 May — Attendee confirmation

The status of confirmations for the in-person event on 31 May (cocktail reception and lunch) is reviewed. The committee establishes a deadline for finalising the number of attendees in order to make the reservation based on reliable figures.

Agreement

- **Monday, 25 May** is established as the deadline for attendee confirmation for the event.
 - The definitive reservation will be made based on the confirmed numbers received by that date.
 - Efforts are under way to mobilise the project's network of contacts in order to maximise attendance.
-

7. Acquisition strategy — Educational funnel as the primary channel

The committee analyses the various high-volume acquisition options available and deliberates on their prioritisation in light of current resources.

A proposal is presented for an acquisition funnel based on free educational content covering economics, monetary history, cryptocurrencies, and tokenisation. An introductory training programme on economics and

blockchain technology is proposed, culminating in the presentation of the project, with an advanced module available for participants wishing to explore the subject in greater depth.

Advertising for this funnel would be channelled through profiles with recognised authority in the economic and financial domain.

Agreement

- It is agreed to **prioritise the educational funnel as the primary high-volume acquisition strategy** for the forthcoming period.
 - The immediate focus until 31 May is the in-person event. From **1 June** onwards, executive planning of the funnel will commence: course structure, landing page, and paid traffic strategy.
 - Participation in international in-person events will be planned strategically, with priority given at this stage to consolidating the community and digital base.
 - Other acquisition channels already in progress will be maintained in parallel.
-

8. Follow-up bot for unconverted users on Telegram

With the aim of optimising the follow-up process, the automation of said process by means of a bot is proposed.

Agreement

- It is agreed to develop a Telegram bot that automatically contacts users who have been present in the channel for an extended period without having completed their onboarding.
 - Implementation is deferred until the structure of the educational funnel has been defined, with the objective of coordinating both actions and maximising their impact.
 - The bot workflow will be designed and shared with the technical team for implementation at the appropriate time.
-

9. Review of technical materials on the token — Use of AI tools

The committee establishes a validation protocol for all technical materials relating to the project prior to their dissemination, with particular attention to information concerning the token and its presence on price aggregators.

Information

- The committee reiterates the importance of communicating with precision the status of the token and its presence on price aggregators.
- It is agreed that any AI-generated material containing technical explanations about the project must be reviewed and validated by the committee before being shared with leadership groups or the broader community.

10. Ongoing promotional actions — Status

The committee takes note of the status of certain ongoing promotional actions.

Information

- The promotion is approved and available for use.
- It is agreed not to activate this promotion in a centralised manner at the present time, given the focus on the 31 May event and the existing operational workload. The activation of this action will be assessed at the appropriate juncture.

11. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
