

MINUTES N° 017

Governance Committee ZERO Energy

Date: 17 June 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its weekly session in virtual format. The meeting combines a governance component and an operational working component, with the participation of an external collaborator from the advertising area. Matters addressed include the airdrop launch, advertising strategy, and digital channel management.

2. Applicable regulation on the airdrop and geographical restrictions

The committee analyses the implications of the current European regulatory framework on crypto-assets (MiCA) for the design of the airdrop. An internal document has been prepared containing a preliminary proposal that includes an analysis of potential regulatory constraints. As a precautionary measure, the advertising campaign associated with the airdrop is directed in this phase exclusively to audiences in Latin America.

Conclusion

- The final decision on the geographical restrictions of the airdrop is deferred until the internal legal review of the prepared document has been completed.
 - Pending a definitive decision, the geographical restriction notice on the airdrop landing page shall remain in place as a preventive measure.
 - The advertising campaign on Meta will continue to be segmented exclusively for Latin America.
 - Committee members with a legal background are requested to review the document prior to the next session.
-

3. Airdrop anti-abuse mechanism

The committee reviews the system designed to prevent multiple fraudulent registrations by the same user (*sybil attacks*) during the airdrop process.

Information

- The verification system encompasses: unique email address, Telegram identifier, registration on the proprietary platform, and IP address control.
- The entire verification process is automated through bots integrated into the platform.
-

Tokens are distributed only upon completion of all required actions: email verification, joining the Telegram channel, viewing the informational video, and sharing on social media.

- The reward system includes additional tokens for referrals who complete the full process, subject to a maximum limit per user.

Agreement

- The analysis of the status of the project's multisig wallet is scheduled as an agenda item for the next session.
 - All committee members are requested to read and provide comments on the airdrop proposal document (version 1) prior to the next meeting.
-

4. Frequency of committee meetings

The committee confirms the continuation of the weekly meeting format as a monitoring and coordination mechanism, given the current operational pace of the project.

Agreement

- The weekly Governance Committee meeting is hereby maintained.
 - The session for the week of 24 June 2026 shall be held with the attendance of available members.
-

5. Advertising campaign report

The results report for the first 48 hours of the advertising campaign launched on 15 June 2026 on Facebook and Instagram, targeting audiences in Latin America, is presented.

Information

- Initial metrics are positive for a newly created profile: the cost per new follower is below the target threshold, and the video interaction rate (*CTR*) significantly exceeds industry benchmark values.
- All content for the current week and the following week has already been scheduled.
- A progressive increase in the daily campaign budget is planned as results justify it, with the objective of scaling in a controlled manner.

Agreement

- The increase of the daily campaign budget is approved before the weekend.
 - Updated metrics will be received following the budget adjustment.
-

6. Advertising funnel strategy for the airdrop

The committee, together with the advertising collaborator, engages in an in-depth discussion on the design of the acquisition and conversion funnel for the airdrop, with the objective of maximising both the number of registrations and the subsequent conversion of participants into project investors.

Agreement

- The adopted acquisition funnel is as follows: **Meta advertisement 'lead capture form 'automated WhatsApp message 'landing page 'platform registration 'token distribution 'project participation offer 'free training oriented towards conversion.**
 - The landing page shall not be used as the first point of contact in the advertising campaign, but rather as a step subsequent to the lead capture form.
 - Two acquisition mechanics will be tested in parallel: a Facebook form and a keyword interaction campaign via video, in order to compare costs and conversion rates.
 - The free training, delivered by the project's trainer, is established as the primary conversion element. It shall be structured as an in-depth presentation tool for the ZERO Energy ecosystem.
 - The keyword mechanic will be used initially to direct audiences to the project's Telegram channel, as a test of the automation.
 - A reactivation plan targeting the project's current investors will be designed, coordinated with the airdrop launch.
-

7. Facebook page management

The coexistence of two Facebook pages associated with the ZERO Energy project is identified: an old page with outdated content, and a new active page on which the current campaign is being executed.

Agreement

- The old Facebook page will be deleted in order to avoid confusion among the public and duplication in the project's digital presence.
 - Once the waiting period established by the platform has elapsed, the new page will be renamed to "Zero Energy" or an equivalent agreed denomination.
 - In the meantime, the new page will continue to operate under its provisional name.
-

8. Digital channels — TikTok

The suitability of TikTok as an acquisition channel for the project at this stage is analysed.

Conclusion

- The committee concludes that TikTok is not the appropriate channel for the target audience profile of ZERO Energy at the current stage, both on the grounds of segmentation criteria and the platform's limitations regarding automation. This channel will not be pursued in the present phase.
-

9. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
