

MINUTES N° 021

Governance Committee ZERO Energy

Date: 15 July 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its regular weekly session with the majority of its members in attendance. The main objectives of the meeting are to review the community engagement strategy, to ratify prior agreements adopted outside of a formal session, and to address the incorporation of a new technology partner to the committee.

2. Community engagement strategy and DAO meetings

The committee analyses the functioning of the open community meetings held during evening hours, noting insufficient participation and results below expectations. The current community involvement model and its suitability to the present phase of the project are likewise discussed.

Conclusion

- It is agreed to suspend indefinitely the DAO meetings held during evening hours due to a lack of sustained participation.
 - It is agreed not to continue with the community leadership group model in its current format, which is considered ineffective at the present stage.
 - It is agreed to concentrate the committee's efforts on the airdrop launch and on the training programme aimed at new participants.
 - The possibility of resuming a periodic community meeting format once the airdrop launch has been completed is left open.
-

3. Organic outreach strategy for the airdrop

The committee analyses the channels for attracting new participants to the airdrop, identifying organic outreach through existing crypto communities as the primary growth lever at the current stage. The importance of participants themselves replicating the outreach through their referral links is highlighted.

Agreement

- It is agreed to design an organic publication strategy targeting communities and groups specialised in cryptocurrencies.
-

It is agreed to incorporate into the training programme specific instructions for new participants to share their airdrop referral link.

- It is agreed to prioritise organic outreach and third-party partnerships as the primary acquisition channels at the current phase of the project.
-

4. External analysis of the business plan — Reference for the masterclass

The committee takes note of an external analysis of the ZERO Energy business plan produced by a community member using artificial intelligence tools. Said analysis identifies the project's innovation, market potential and narrative as key strengths, and highlights as areas for improvement the further development of the financial model, the tokenomics, and the argumentation of the competitive advantage over comparable projects in the sector.

Conclusion

- The analysis is taken as an internal reference to strengthen the content of the masterclass.
 - It is confirmed that the masterclass will serve as the primary vehicle for presenting in detail the strategy, protocol, tokenomics and competitive positioning of ZERO Energy, complementing the information available in the public business plan.
 - It is agreed to incorporate into the masterclass script differentiation arguments with respect to comparable projects in the energy tokenisation and carbon certification sector.
 - It is agreed to invite the author of the analysis to participate in the training programme.
-

5. Approval of the team landing page

The creation of a ZERO Energy team presentation page is proposed, to include the Governance Committee, the working team, active ambassadors and project partners. The objective is to provide the community and potential participants with a clear overview of the individuals and institutions supporting the project, and to link it to the public documentation repository (GTAP).

The approved structure comprises the following sections:

- **Section 1 — Governance Committee:** presentation of each member with photograph, role and professional profile, together with a link to the GTAP repository containing the public minutes.
- **Section 2 — Working Team:** individuals responsible for the operational execution of the project.
- **Section 3 — Ambassadors:** photograph and name of active ambassadors.
- **Section 4 — Partners:** collaborating entities with links to their official websites.

Agreement

- The proposal is put to a vote and is **approved unanimously** by the members present with active voting rights.

- All committee members must prepare or update their LinkedIn professional profile to reflect their role in ZERO Energy, prior to the launch of the training programme.
 - Active ambassadors must submit their photograph for inclusion on the landing page.
 - It is agreed to publish the committee's bylaws in the GTAP repository, the upload of which is currently pending.
-

6. Ratification of agreements adopted outside of a formal session

The need is raised to formally ratify in the minutes several agreements that were adopted through consultation via the committee's communication channels and had not been recorded in the minutes of a regular session.

Agreement

The following agreements are formally ratified by the committee:

- **6.1 — Ratification of prior economic agreement:** A prior agreement adopted through prior consultation is formally ratified. Details are recorded in the internal minutes.
 - **6.2 — Collaboration with a technology partner for Web3 development:** The collaboration with a technology partner specialised in Web3 development to support the technical component of the project is ratified.
 - **6.3 — Airdrop launch strategy:** The go-to-market strategy via airdrop is ratified as a standing agreement of the committee.
-

7. Incorporation of a new member to the Governance Committee

The committee deliberates and approves the incorporation of a new member with a technical profile specialised in Web3 development, with the aim of integrating the technological dimension into the project's governance and strengthening cohesion between the development team and the committee.

Agreement

- The proposal is **approved by the committee**.
 - The new member will participate in the committee's weekly sessions under the same conditions as the remaining ambassadors.
 - The incorporation will be formalised once the new member has received and accepted the committee's bylaws.
 - It is agreed to formally recognise the new member's affiliation with the project in accordance with the current internal governance mechanisms.
 - The formal incorporation will be ratified at the next regular session of the committee with all members in attendance.
-

8. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
