

MINUTES N° 022

Governance Committee ZERO Energy

Date: 22 July 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its weekly meeting for informational and update purposes. The session includes the onboarding of a new external collaborator in the field of technical development.

2. Onboarding of a new external collaborator in the field of technical development

The committee informs of the formalisation of a collaboration agreement with an external developer specialising in smart contracts. The agreement has been signed by both parties and is currently in force.

Agreement

- The smart contract development agreement is hereby formalised and signed by both parties.
 - The agreement is governed by the terms set out in the collaboration contract.
 - The effective start date for smart contract development is set for **September 2026**, in parallel with the airdrop launch.
 - The external collaborator will receive merit tokens for their participation in the committee during the months of July and, where applicable, August 2026.
-

3. Introduction of the external collaborator and strategic vision

The new external collaborator is introduced to the committee and shares their vision for the ZERO Energy project, as well as their ideas for contributing to the ecosystem.

Information

- The collaborator expresses enthusiasm for the project and their focus on integrating ZERO Energy into the daily lives of users with solar energy installations.
- A future vision is proposed involving the potential development of a marketplace within the platform, enabling users to redeem ZE tokens for products or services from partners, thereby generating a token buyback mechanism for the protocol. This idea is noted as a long-term proposal, with no priority in the current phase.
-

The committee reaffirms the project's strategic focus: building an ecosystem in which solar energy generation translates into profitability for users through tokens, and demonstrating the utility of blockchain in the management of energy certificates.

- The long-term vision of tokenising solar farms and enabling collective community investment through the protocol is shared.
- The external collaborator commits to raising the visibility of the ZERO Energy project at crypto ecosystem events, contributing to its positioning ahead of the publication of the smart contracts.
- The dissemination of ZERO Energy promotional content through additional web3 ecosystem channels is agreed upon.

Conclusion

- The marketplace idea is recorded as a future proposal with no impact on the current roadmap.
 - The external collaborator will act as an informal representative of ZERO Energy at events within the crypto sector.
 - The committee will explore technological integration pathways for connecting solar installations to the protocol, with a view to a beta pilot test.
-

4. Investor acquisition strategy — Active promotion until September

The committee reviews the status of the special promotion for high-value investors approved in previous sessions and reinforces the need to activate the contact networks of all ambassadors during the summer period.

Agreement

- The special promotion for investors with preferential conditions on merit token allocation remains active until **1 September 2026**.
 - The committee notes that **1 September 2026** marks the close of the open pre-sale phase, after which pre-sale tranches will be structured according to investment volume.
 - The committee reinforces project outreach activities during the summer period with the aim of broadening the investor base.
-

5. Committee meeting dynamics

The new external collaborator is briefed on the standard operating procedures of the Governance Committee meetings.

Information

- The weekly Wednesday meetings at 9:00 AM are held for monitoring purposes and last approximately 30 minutes.
-

The first Wednesday of each month hosts an extended session dedicated to formal decision-making and voting.

- Extraordinary votes may be conducted through the internal channels established by the committee, carrying the same validity as a vote held during a session.
-

6. Delivery of merit tokens to new collaborators

The merit token delivery schedule for newly onboarded external collaborators is clarified.

Agreement

- Merit tokens corresponding to new external collaborators will be delivered in **September 2026**, coinciding with the formal commencement of their activities within the project.
 - Collaborators must have their wallet operational before that date in order to receive the tokens.
-

7. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
