

MINUTES N° 013

Governance Committee ZERO Energy

Date: 13 May 2026 **Time:** 9:00 AM **Duration:** 3:00 h **Modality:** Virtual

1. Opening of the session

The ordinary session of the Governance Committee is hereby opened with the participation of the convened members. The session addresses the review of the current governance model, the acquisition and communication strategy, the planning of upcoming events, and the reorganisation of the community meeting calendar.

2. Review of the governance model and committee restructuring

The committee analyses the current functioning of the weekly meetings and their adequacy to the project's needs at the present stage. The advisability of transforming the governance model is raised, with a view to orienting it more towards action and results, and broadening participation to the project's leadership group.

The proposal to adopt sociocracy principles as an alternative decision-making system is also examined, assessing its applicability within the context of a DAO project.

Agreement

- The Governance Committee is maintained with monthly meetings, of a more strategic and less operational nature.
 - Weekly meetings are extended to the leadership group (ambassadors and active contributors), with the aim of giving greater voice and visibility to effective work within the project.
 - Internal working sessions of the committee will be maintained in accordance with the project's needs.
 - The sociocracy model will be studied for possible future implementation.
 - The community will be informed of the committee restructuring and the opening of the leadership space.
-

3. Review of the merits and compensation system

The committee reviews the current merit allocation system and its medium-term sustainability, with the objective of ensuring the liquidity required for the upcoming phases of the project. The relationship between merits assigned to internal roles and the project's capacity to fund acquisition and growth strategies is analysed.

Specific economic terms are recorded internally.

Agreement

- The current cycle is closed in accordance with the existing merits scheme.

- From the next cycle onwards, a new merits and compensation proposal will be implemented, placing greater weight on active work and reviewing the existing role structure.
 - The reference criterion for merit communication is unified in accordance with the new internally approved scheme.
 - Recognition by ambassador rank is maintained unchanged so as not to discourage participation.
 - A deadline for the transition to the new scheme will be established and communicated.
-

4. Acquisition strategy: airdrop and referrals

The committee analyses the organic growth detected on social media and the acquisition opportunities this generates. Strategies to broaden the participant base are discussed, including an airdrop campaign and the enabling of referral accounts to channel external traffic towards the project.

Agreement

- Referral accounts will be enabled to manage external traffic towards the project.
 - An airdrop strategy linked to social media outreach actions will be developed, for activation once the system is ready.
 - The acquisition message is unified around the project's value proposition.
 - Graphic materials communicating the conditions of participation in the current phase will be designed.
-

5. Token purchase process by card and technical improvements

The current token purchase flow via payment card is reviewed, with areas for improvement in the user experience identified. It is agreed to reinforce communication of the process and to produce supporting materials prior to its mass dissemination.

Agreement

- A video tutorial will be produced providing a comprehensive explanation of the card request and payment process.
 - It is recommended to await the full refinement of the process before communicating it on a large scale to the community.
-

6. Communication strategy: narrative, team identity and project philosophy

The committee discusses the project's public communication strategy, with particular attention to building trust with the community and determining the appropriate moment to reveal the team's identity.

Agreement

- Communication focuses on the project's philosophy: clean energy, decentralised governance, and the DAO model.
 - The public presentation of the team will be carried out progressively as the project's milestones are reached.
 - Each committee member will prepare a professional profile to be published as the project advances and the planned milestones are achieved.
 - The central message is unified around the token's value proposition, the presale conditions, and the fund custody guarantees provided by multi-signature mechanisms.
 - Advanced technical documentation will be published progressively as the project advances.
-

7. In-person event on 31 May and online presentation on 27 May

The committee reviews the state of preparation for the in-person event scheduled for 31 May in Madrid and the online presentation on 27 May. It is agreed to intensify the promotion of the event among the leadership group and the community.

Agreement

- The immediate priority is the active mobilisation of leaders and contributors for the event on 31 May.
 - Online presentations are set for the last Wednesday of each month. The next will take place on **27 May 2026**.
 - All committee members and members of the leadership group commit to actively inviting their contacts to both events.
-

8. Leadership group: integration and permanence criteria

The operating model of the project's leadership group is defined, including the criteria for integration and permanence, and the process for its launch.

Agreement

- The leadership group will comprise ambassadors and contributors with the willingness and capacity to lead.
- Active participation in the leadership group will be periodically evaluated in accordance with the contribution criteria defined by the committee.
- Prior to the launch of the scheduling survey to the community, an informational message will be sent regarding the committee restructuring and the opening of the leadership space.
- A prior internal poll will be conducted within the leadership group to narrow down the scheduling options before presenting them to the community.

9. Restructuring of the community meeting calendar

The committee analyses the current meeting calendar and proposes a new structure of three weekly sessions designed to address the different needs of the community.

Agreement

The following weekly calendar is provisionally agreed, pending validation through a survey within the leadership group:

- **Monday:** Ambassadors' meeting (maintained).
- **Wednesday:** Training and information session on the protocol, aimed at the leadership group and the community.
- **Thursday:** Support session for new participants (registration, step-by-step guidance).

The objective is to offer three types of community support: participation, information, and technical assistance.

10. Management of minutes, recordings and publication on GitHub

The committee reviews the process for drafting, reviewing, and publishing minutes in the project's public repository.

Agreement

- Minutes are drafted from the recording of each session and are reviewed internally prior to publication in the public repository.
 - The purpose of the final review is to ensure that no sensitive information is published.
 - Session recordings are stored in the project's internal systems for use by the committee.
 - It is agreed to ensure that all future sessions are correctly recorded.
-

11. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned. Formal votes on the agreements adopted will be conducted through polls in the designated channel, in accordance with the new agreed procedure.
