

MINUTES N° 007

Governance Committee ZERO Energy

Date: 25 March 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its seventh ordinary session with the aim of reviewing the status of the project, planning upcoming strategic events and advancing community engagement initiatives. The session addresses four main blocks: international events, an in-person event in Madrid, community participation and the presentation of digital tools.

2. International event — Expansion in Latin America

The committee analyses ZERO Energy's participation in a leading event in Latin America as a priority strategic action for the project's entry into the region. The scope of the event, operational logistics and the on-site action plan are assessed.

Agreement

- ZERO Energy's participation in the Latin American event is agreed upon as a firm decision of the committee.
 - The operational plan includes presence in the main auditorium, networking meetings and project presentation activities targeting strategically relevant profiles.
 - Operational details will be finalised at the next session.
 - It is agreed to manage, on an urgent basis, the logistical coordination and reservation of travel arrangements.
-

3. In-person event in Madrid — Business presentation

The committee proposes the organisation of an in-person event in Madrid featuring a project presentation, cocktail format and audiovisual material from previous project events. The objective is to re-engage the existing team, raise the project's visibility and attract new members.

Agreement

- It is agreed to organise the in-person event in Madrid with a minimum target of 50 attendees.
- The tentative date is set for the last weekend of April or the first weekend of May, pending confirmation with the venue.
- A controlled-capacity strategy will be applied to ensure the quality of the experience.

- A registration page will be set up to manage attendance and distinguish between current members and new guests.
 - The event will incorporate audiovisual material from previous project events to provide narrative continuity for the project.
 - The definitive date and format will be confirmed at the next session.
-

4. Active community participation

The committee discusses a change of model in its relationship with the community, aimed at fostering active participation and a sense of belonging among members.

4.1 Weekly ambassadors' meeting

It is proposed to reformulate the weekly Monday meeting as the "Ambassadors' Meeting", with a participatory, co-founder-oriented approach, replacing the previous training-based format.

Agreement

- The new format for the Monday meeting is approved under the designation "Ambassadors' Meeting", with committee participation and periodic evaluation of its progress.

4.2 DAO channel on Telegram

It is proposed to create a dedicated Telegram channel named "DAO" to centralise communication with the community: publication of minutes, event announcements, surveys and votes.

Agreement

- The creation of the DAO channel on Telegram is approved.
- The channel will serve as a link between the committee and the community, publishing the minutes from the public repository and relevant announcements on a weekly basis.

4.3 Community access to committee meetings

A vote is held on whether community members may attend Governance Committee meetings as observers.

Agreement

- The committee establishes the Monday Ambassadors' Meeting as the open participation space for the community, serving as the primary channel of interaction between the project and its members.

4.4 Treasury transparency — Public multisig wallet

The committee discusses the publication of the multisig wallet address and treasury records in the public GitHub repository as a transparency measure for the community.

Conclusion

- The committee views positively the future publication of the multisig wallet and transaction records as a tool for transparency and trust.
 - It is agreed to publish the multisig wallet address and transaction records progressively, accompanied by an explanatory document on the treasury history, which is currently being drafted.
-

5. Digital tools — Acquisition and onboarding system

The committee reviews the digital tools system developed for the acquisition and onboarding of new members. A screen-shared demonstration of the complete flow is conducted.

Information

The system presented integrates the following elements:

- **Telegram welcome channel:** Single entry point for new members, featuring an automatic welcome message and a link to the onboarding system.
- **Onboarding landing page:** Accessible exclusively via Telegram. Includes a short presentation video, a full project overview, sequential tutorials for registration and token purchase, a business plan downloadable in three languages, an integrated events calendar, an artificial intelligence assistant for query resolution, an ambassador guide with the new member onboarding system, a knowledge assessment and visual material for social media.
- **Administration panel:** Allows real-time updates to the landing page content (schedules, speakers, meetings) without technical intervention. Changes are automatically reflected on the landing page and in automated Telegram publications.

Agreement

- Several minor issues on the landing page (calendar link, window opening) are identified and resolved during the session.
 - The committee regards the system as a key tool for community onboarding and growth.
 - It is agreed that the ambassador's mission is simplified to three actions: bringing people into the Telegram channel, providing personalised follow-up and accompanying them to the Wednesday live sessions to resolve queries, with the aim of facilitating access to the project and addressing questions on a personalised basis.
-

6. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
