

MINUTES N° 011

Governance Committee ZERO Energy

Date: 29 April 2026 **Time:** 9:00 AM **Modality:** Virtual

1. Opening of the session

The Governance Committee holds its regular weekly session with the aim of reviewing the community activation strategy, analysing the balance of the most recent in-person event, and planning forthcoming actions. The session takes place in virtual format with the participation of the committee's regular members.

2. Community activation strategy and the use of artificial intelligence as a planning tool

The committee analyses the use of artificial intelligence (AI) tools to support the team's weekly tactical planning. A query previously submitted to an AI agent regarding the feasibility of completing the pre-sale campaign exclusively through digital marketing is shared and discussed.

Conclusion

- The AI concludes that online marketing campaigns alone are insufficient to meet pre-sale objectives; word of mouth, an active community, and network leadership are essential elements.
 - It is agreed to incorporate AI as a weekly tactical planning tool: the committee will provide project context and obtain concrete task schedules for execution.
 - It is agreed that each committee member must generate active content (videos, posts) in a coordinated manner, so that the rest of the team reacts to and amplifies said content.
 - It is agreed to review the participation incentive model. The meeting-attendance reward scheme is placed on hold; a model based on incentives for specific and verifiable actions (acquisition of new investors, content generation, group activation, etc.) will be explored instead.
 - The detailed definition of the AI-guided weekly task structure is deferred to the next session or to a dedicated working channel.
-

3. Review of the previous in-person event and planning of the next event (24 May 2026)

The committee conducts an analysis of the recently held in-person event, identifying positive aspects and areas for improvement, with a view to organising the next event scheduled for **24 May 2026**.

3.1 Review of the previous event

Conclusion

- The financial terms of the event are recorded internally. It is noted that the revenue collected covered the costs of the event.
- The main areas for improvement identified are: coordination in the confirmation of attendees, menu management, and the synchronisation of the registration process for new participants during the event.
- It is agreed that each committee member must be autonomous in managing the registration of their own guests, using their personal referral link, and must be fully familiar with the process prior to the event.

3.2 Planning of the event on 24 May 2026

Agreement

- The next in-person event is confirmed for **24 May 2026**.
 - The following indicative schedule is established:
 - **11:00 AM** — Team arrival and room preparation.
 - **12:00 PM** — Doors open with background music.
 - **Until 1:30 PM** — Project presentation.
 - **1:30–2:15 PM** — On-site registration activity: each committee member accompanies their guests through the sign-up process, demonstrating the system live. The room remains closed during this period.
 - **2:15 PM** — Cocktail reception and lunch begin.
 - It is agreed to centralise attendance confirmation and menu management in a single shared tool (Google Sheets or equivalent).
 - It is agreed to conduct a simulation or rehearsal of the registration process prior to the event to ensure that all committee members can execute it fluently.
 - Each committee member must communicate the final number of their guests no later than one week before the event.
-

4. Exploration of synergy with an exchange platform and welcome promotion

The committee analyses a collaboration proposal with a crypto-asset exchange platform that includes a welcome promotion for new users. The potential of this initiative as a tool for attracting and onboarding new participants into the ZERO Energy ecosystem is assessed.

Agreement

- It is agreed to explore the integration of this promotion as an acquisition channel for the ZERO Energy community.
- It is agreed to produce a tutorial explaining the platform registration process, the mechanics of the promotion, and how to redirect the reward obtained towards the project.
-

It is agreed to analyse in greater detail the potential synergy with other external communities that could benefit from this promotion.

- The technical details and necessary links will be shared with the team as soon as possible.
-

5. Meeting with external collaborator — video for team review

The committee takes note of a meeting recently held with an external collaborator, in which possible avenues of integration and collaboration with the ZERO Energy project were discussed.

Agreement

- It is agreed to upload the recording of said meeting to the team's shared folder (Google Drive) so that all committee members may review it prior to the next session.
-

6. Exploration of an in-person event in Colombia

The committee addresses, on a preliminary basis, the possibility of organising an in-person event in Colombia as part of the project's expansion strategy in Latin America.

Information

- The matter is currently at an initial exploratory stage.
 - It is agreed to delegate the logistical research (flights, accommodation, and cost estimation) to those committee members with the closest ties to the region, who will present a concrete proposal at a forthcoming session.
-

7. Internal communication and team commitments

The committee reflects on the importance of maintaining agile communication channels and appropriate response times among its members, particularly in situations requiring urgent coordination.

Agreement

- The communication commitments agreed upon in previous sessions are reaffirmed: visibility of shared materials, reasonable response times, and availability during critical coordination moments.
 - It is agreed to put forward, at the next session, a formal system for monitoring the level of engagement and activity of each committee member.
-

8. Closing of the session

With no further matters to discuss, the session of the Governance Committee is hereby adjourned.
