

MINUTES No. 006

ZERO Energy Governance Committee

Date: March 18, 2026 **Time:** 9:00 AM **Format:** Virtual

1. Opening of the session

The ordinary session of the ZERO Energy Governance Committee begins with reduced attendance from its members. After verifying the impossibility of reaching the usual quorum required for strategic deliberations, the attendees agree to hold an abbreviated session focused exclusively on urgent operational and organizational matters requiring immediate attention to ensure the continuity of the protocol's activities.

The session is conducted remotely through the internal communication channels enabled by the Committee.

2. In-person event — Registration management and logistical coordination

The Committee reviews the operational organization of an upcoming in-person event involving members linked to the ZERO Energy ecosystem.

The need to centralize and validate the information of confirmed attendees is presented with the objective of:

Properly processing the corresponding registrations. Coordinating access and accreditations. Organizing logistical and operational aspects related to institutional participation. Facilitating internal communication prior to the event.

Likewise, the importance of maintaining organizational and documentary traceability for all activities related to in-person events connected to the protocol is reiterated.

Resolution

By unanimous agreement of the attending members, the following is resolved:

Committee members and collaborators with confirmed attendance must submit, as soon as possible, the following information:

- Full name and surname.
- Contact telephone number.
- Email address.

The information must be sent exclusively through the internal channels enabled by the Governance Committee, respecting all applicable confidentiality and data protection measures.

The logistical and administrative coordination of the event will be temporarily centralized under the individuals designated for this function.

The financial terms, participation conditions, and specific organizational aspects related to the event are recorded within the corresponding internal documentation of the protocol.

3. Pending work and subsequent technical session

Attendees are informed that, once the official Committee session concludes, several available members will continue working informally on various pending matters requiring technical review, operational refinement, and additional strategic development.

Among the pending matters under follow-up are:

- Review of internal documentation.
- Coordination of organizational tasks.
- Monitoring of operational actions linked to the development of the protocol.
- Preparation of future sessions and work proposals.

It is hereby stated that any conclusion, proposal, or decision arising from said informal session must subsequently be incorporated into the corresponding internal documentation and, where applicable, formally submitted to the Committee for official validation.

Information

- Work on pending matters will continue in an informal session following the official closure of the meeting.
-

4. Closing of the session

There being no further matters to discuss within the agenda established for this abbreviated session, the meeting of the ZERO Energy Governance Committee is hereby concluded, expressing appreciation for the attendance and collaboration of the participating members.
